ReTRAC Project – Mitigation Monitoring Program (MMP)

Annual Report 2004-2005

Accomplishments, Project Completions and Anticipated Work

Mitigation Monitoring Program/Environmental Management

Major Accomplishments of 2004-2005 (October 1, 2004 to September 30, 2005)

Soils

- Removed and disposed of 151,809 cubic yards of regulated fill material
- Removed and recycled 223,637 cubic yards of rock
- Completed excavation / placement of 406,354 cubic yards re-use materials
- Completed remediation of the third UST
- Completed management of contaminated groundwater during excavation “in-the-wet” (532,945 gallons)
- Disposed of hazardous waste in a regulated landfill

Cultural Resources

- Completed monitoring of earth disturbing activities (EDAs) and sediments with potential cultural materials
- Completed analysis of collected artifacts and archaeological remains, completed draft report writing and internal review

Surface Water

- Continued to perform weekly inspection for best management practices (BMP) compliance

Air Quality

- Continued tracking of downtown PM10 impacts and project activities as a quality oversight function for compliance with emission requirements

Noise

- Completed long-term vibration monitoring during shoofly use
